Corporate Account Takeover & Information Security Awareness
The information contained in this session may contain privileged and confidential information.

This presentation is for information purposes only. Before acting on any ideas presented in this session; security, legal, technical, and reputational risks should be independently evaluated considering the unique factual circumstances surrounding each institution.

No computer system can provide absolute security under all conditions.

Any views or opinions presented do not necessarily state or reflect those of Community First Bank or any other entity.
What will be covered?

- What is Corporate Account Takeover?
- How does it work?
- Statistics
- Current Trend Examples
- What can we do to Protect?
- What can Businesses do to Protect?
What is Corporate Account Takeover?

A fast growing electronic crime where thieves typically use some form of malware to obtain login credentials to Corporate Online Banking accounts and fraudulently transfer funds from the account(s).
Malware

Short for *malicious software*, is software designed to infiltrate a computer system without the owner's informed consent.

Malware includes computer viruses, worms, trojan horses, spyware, dishonest adware, crimeware, most rootkits, and other malicious and unwanted software.
Domestic and International Wire Transfers, Business-to-Business ACH payments, Online Bill Pay and electronic payroll payments have all been used to commit this crime.
How does it work?

- Criminals target victims by scams
- Victim unknowingly installs software by clicking on a link or visiting an infected Internet site.
- Fraudsters began monitoring the accounts
- Victim logs on to their Online Banking
- Fraudsters Collect Login Credentials
- Fraudsters wait for the right time and then depending on your controls – they login after hours or if you are utilizing a token they wait until you enter your code and then they hijack the session and send you a message that Online Banking is temporarily unavailable.
Where does it come from?

- Malicious websites (including Social Networking sites)
- Email
- P2P Downloads (e.g. LimeWire)
- Ads from popular web sites

Web-borne infections:

According to researchers in the first quarter of 2011, 76% of web resources used to spread malicious programs were found in 5 countries worldwide ~ United States, Russian Federation, Netherlands, China, & Ukraine.
**Rogue Software/Scareware**

- Form of malware that deceives or misleads users into paying for the fake or simulated removal of malware.
- Has become a growing and serious security threat in desktop computing.
- Mainly relies on social engineering in order to defeat the security software.
- Most have a Trojan Horse component, which users are misled into installing.
  - Browser plug-in (typically toolbar).
  - Image, screensaver or ZIP file attached to an e-mail.
  - Multimedia codec required to play a video clip.
  - Software shared on peer-to-peer networks
  - A free online malware scanning service

Dear John Doe,

Your credit card ending in 9595 will expire soon. To avoid any disruption to your PayPal service, please update your credit card expiration date by following these steps:

1. Log in to your PayPal account.
2. Go to the Profile subtab and click Credit Cards in the Financial Information column.
3. Choose the credit card that needs updating and click Edit.
4. Enter the updated information.

Or simply get the PayPal Gold Card, approved almost instantly, and there's no annual fee. [Apply today](https://www.paypal.com/us/cgi-bin/webscr?cmd=_bc-signup)

Sincerely,
PayPal

Please do not reply to this email. This mailbox is not monitored and you will not receive a response. For assistance, log in to your PayPal account and click the Help link in the top right corner of any PayPal page.

To receive email notifications in plain text instead of HTML, update your preferences.

PayPal

This email is authentic. It is addressed to you personally. The sender appears to know the last 4 digits of your account number. The links are obscured but hovering on the link shows a valid PayPal address.
CAUTION!

• What may be relied upon today as an indication that an email is authentic may become unreliable as electronic crimes evolve.

• This is why it is important to stay abreast of changing security trends.
Hello!

We were not able to deliver postal package you sent on the 14th of March in time because the recipient’s address is not correct. Please print out the invoice copy attached and collect the package at our office.

Your United Parcel Service of America
This email is fraudulent. It is not addressed to you by name. The FROM address is nonsense. The fraudster is counting on you to open the zip and execute the enclosed computer virus.
Some experts feel e-mail is the biggest security threat of all.

The fastest, most-effective method of spreading malicious code to the largest number of users.

Also a large source of wasted technology resources.

Examples of corporate e-mail waste:
- Electronic Greeting Cards
- Chain Letters
- Jokes and graphics
- Spam and junk e-mail
What we can do to PROTECT?

- Provide Security Awareness Training for Our Employees & Customers
- Review our Contracts
  Make sure that both parties understand their roles & responsibilities
- Make sure our Customers are Aware of Basic Online Security Standards
- Stay Informed
  Attend webinars/seminars & other user group meetings
- Develop a layered security approach
Layered Security approach

- Monitoring of IP Addresses
- New User Controls – Administrator can create a new user. Bank must activate user.
- Calendar File – Frequencies, and Limits
- Dual Control Processing of files on separate devices – recommended
- Fax or Out of Band Confirmation
- Secure Browser Key
- Pattern Recognition Software
What can Businesses do to Protect?

- **Education is Key** – Train your employees
- **Secure your computer and networks**
- **Limit Administrative Rights** - Do not allow employees to install any software without receiving prior approval.
- **Install and Maintain Spam Filters**
- **Surf the Internet carefully**
- **Install & maintain real-time anti-virus & anti-spyware desktop firewall & malware detection & removal software.** Use these tools regularly to scan your computer. Allow for automatic updates and scheduled scans.
- **Install routers and firewalls to prevent unauthorized access to your computer or network.** Change the default passwords on all network devices.
- **Install security updates to operating systems and all applications as they become available.**
- **Block Pop-Ups**
What can Businesses do to Protect?

- Do not open attachments from e-mail - Be on the alert for suspicious emails
- Do not use public Internet access points
- Reconcile Accounts Daily
- Note any changes in the performance of your computer
  Dramatic loss of speed, computer locks up, unexpected rebooting, unusual popups, etc.
- Make sure that your employees know how and to whom to report suspicious activity to at your Company & the Bank

  Contact the Bank if you:
  > Suspect a Fraudulent Transaction
  > If you are trying to process an Online Wire or ACH Batch & you receive a maintenance page.
  > If you receive an email claiming to be from the Bank and it is requesting personal/company information.
Community First Bank

• Thank You for taking the time to view this educational presentation and we hope that it helps enlighten you to some of the threats that prevail.

• Please Call or email if you have any questions.
